

USER'S INSTRUCTIONS

Mattress Inflatable Double

capri
camping

Read instructions carefully before using product.

Preparation

1. Unfold and stretch out mattress on a flat surface with velvety side up.
2. Make sure area is free from objects and debris that could tear or pierce mattress.
3. When carrying it inflated beware of corners or objects that may make holes in mattress.

Inflating procedures

1. Place the rubber and the screw-caps on mattress escape valve.
2. Find the pump (spring and valve) located in one of the corners of the mattress; remove the screw and the rubber caps from the opening and leave cap wide open.
3. Press your foot on the pump covering the suction opening during the compression movement.
4. When decompressing the pump, on its way back, make sure you totally lift your foot so the air completely fills it (allowing for outside air to re-enter through same opening).
5. Continue procedures 3 and 4 until mattress reaches the desired pressure (wrinkles disappear).
6. Re-insert both the rubber and the screw-caps in the pump opening.

Deflating procedures

1. Unscrew plastic cap and displace cap located on the single valve (springless) to completely empty the air.

Attention

1. Keep mattress away from fire and flames.
2. This mattress is not adequate for daily use.
3. Do not place it on a bedframe.
4. Do not exceed pressure – it could cause rupture of welding (fill it till wrinkles disappear).
5. Use mattress with velvety side up.
6. This product can also be inflated by standard pumps.

Cleaning and storage

1. If mattress is wet it is advisable to let it dry before getting it ready for storage.
2. To clean use a soft clean cloth both on the flocked surface and on PVC.
3. Do not use detergents or chemical products.
4. Before storing product make sure it is totally empty of air. Store in a cool and dry place.
5. Do not place heavy or pointed objects near or on top of mattress to prevent damage and cuts.
6. If product develops any hole use the Repair Kit supplied.
